Does your emergency stop comply with IEC Safety Standards?

Schneider Electric

Introducing

Harmony range.

The trigger-action emergency stop that ensures Standards compliance.

There are two types of emergency functions defined by the IEC 60204 directive: emergency stop for mechanical risks and emergency switching off for other risks. But knowing which one is right for your installation is not always easy.

To help you make the right choice, the new Harmony Trigger-Action Emergency Stop range combine both functions in one device.
