Article number: 302ESD055

EAN: 4010995081829

Customs tariff number: 82054000

Increases your efficiency: Unique Wiha handle-length concept for optimum balance of torque and control.
Protects your health: With the patented SoftFinish® handle design, ensuring work is kind to hands and muscles. Recommended by doctors and therapists at German Campaign for Healthier Backs.
Lowers your costs: Electrostatically conductive tools protect electronic components from damage.
Application: Suitable for working on components susceptible to electrostatic discharge.
Users risk damaging electronic components irreparably when working on them. This becomes a thing of the past with the SoftFinish® ESD screwdriver. The dissipative tool safely channels electrostatic energy away in a controlled fashion. ESD screwdrivers are manufactured in line with the IEC 61340-5-1 international standard and thus guarantee maximum protection for electronic components. These screwdrivers have a surface resistance between 10^6 - 10^9 ohm. They also stand out due to their sophisticated handle size concept. The long, slender handle sizes can be used to fasten small screws quickly and firmly. There are also large handle sizes to fasten large screws which can be used to apply greater torques. The various handle sizes have also been matched to the consistently same-sized hand of screw-fastening professionals. The position of the soft and hard zones on the handle also supports the perfect grip for quick and powerful turning.
IEC 61340-5-1.

Customs tariff number	82054000
Slotted 1	5.5 mm
Self service - packing	No
Cutting strength 1	1,00 mm
Handle diameter	30 mm
